

THE NEW LOOK OF POWER SYSTEMS

Signature Series

Air-Cooled Power Modules

The Signature series of power modules are available as AC to DC rectifiers/power supplies, DC-DC converters, and DC-AC Inverters from a few hundred watts up to ten kilowatts per module. All models feature drip resistant construction, flush front panels with folding handles, front panel loading, hot bus pluggable and N+1 parallel redundant operation.

2U Signature Series Power Supply Shelf

Larger units incorporate CAM-actuated insertion and removal with interlocking power-on and power-off for hot plug blind insertion in large (N+1) parallel redundant systems including inverters. All front panels are in standard multiple of 1U (1.75") in height through 5U in height as illustrated in the figures below.
